Drawn by 78

Physical Description:

Paste Group (lenses + figurines) Thickness 4.7 cm

Form (lenses):

Height 13.1 cm

Width 12.0 cm

Diameter -

Handle width -

Handle thickness -

Full

Verbal Description

Small fragment of a large metate - just the corner with leg. Top fairly smoothed and slightly dipped; bottom less-smooth, but still worked. Breaks on three sides - all fairly smoothed and eroded (suggesting that it was broken in antiquity). The leg segment is very thick - 7.8 cm wide and only 6.5 cm of its length remaining. The bottom of the leg, though is smoothed by erosion, but still irregular.
